MIKE KELLEY

TECHNICAL WRITING / DOCUMENTATION ENGINEERING / LEADERSHIP

North Salt Lake, UT • (385) 298-3184 • mikekelley89@gmail.com • Portfolio: mikekelley89.github.io

PROFILE

Technical documentation professional with 15+ years of experience creating developer, API, regulatory, and end-user content. Hands-on with docs-as-code, publishing automation, HTML/CSS, Git, Python, and MadCap Flare, with a background in documentation operations and team leadership.

EXPERTISE

Technical Documentation: API and developer documentation · Information architecture · Regulatory documentation · Single-source publishing

Documentation Engineering: Docs-as-code · Git · CI/CD · MadCap Flare (Certified Advanced Developer) · Jekyll · PrinceXML

AI-Assisted Workflows: Prompt engineering · AI-assisted writing and development · Content review and quality assurance

Technical Skills: XML · HTML/CSS · JavaScript · Python · Jira · Confluence

Leadership & Operations: Team leadership · Documentation strategy · Process improvement · Cross-functional collaboration

PROFESSIONAL EXPERIENCE

Documentation Supervisor | Petersen, Inc. Jun 2026–Present

- Lead eight documentation specialists and final inspectors supporting defense, nuclear, and commercial manufacturing programs.
- Coordinate documentation priorities, schedules, quality issues, and workflow improvements with Engineering, Quality, Manufacturing, and Program Management.
- Coach team members through performance goals and development plans.
- Developing a multi-agent AI documentation-review system (in progress), with a roadmap to evaluate documentation packages against SOPs, SWIs, industry specifications, and customer requirements from three perspectives: Petersen, end user, and customer.

Senior Technical Writer II | Magnit Global / Google Dec 2023–Dec 2025

- Expanded MadCap Flare XML publishing from PDF-only to HTML and PDF; developed CSS for consistent output.
- Worked with aviation regulatory experts on documentation supporting FAA, CAA, and CASA requirements.

Senior Documentation Engineer | Watershed Informatics Oct 2022–Apr 2023

- Documented an API-based DNA sequence alignment platform and improved Python errors, type hints, and docstrings used by its documentation site.

Senior Technical Writer | Shape Security (F5) Oct 2018–Oct 2022

- Led documentation tools and processes, including Git-based source and publishing workflows.
- Customized MadCap Flare conditions and CSS for documentation portal presentation and internal-only content.

Senior Technical Writer II | SaltStack Nov 2017–Oct 2018

- Migrated documentation from Sphinx/LaTeX to Markdown, Jekyll, and PrinceXML.
- Reviewed and merged developer and open-source community pull requests that could trigger CI/CD documentation builds; led documentation team activities and hiring.

Principal Information Developer | inContact Apr 2014–Nov 2017

- Built custom MadCap Flare skins using jQuery, HTML5, and CSS3; established styles and standards and developed interactive hover maps.
- Led tools, processes, and development of the online help interface.

Senior Technical Writer | Adaptive Computing Oct 2008–Apr 2014

- Produced single-source web and print documentation in MadCap Flare and improved usability through jQuery UI and documentation navigation.

Technical Writer II | Adecco Technical Jun 2007–Aug 2008

- Created training materials and certification exams for HP field service agents; edited material for localization.

Technician II / Supervisor I | Adecco Technical / HP Jun 2002–Jun 2007

- Hired, trained, and supervised up to 19 QA technicians; documented defects and complex testing procedures.
